After you collaborate

project

Project collaboration takes place when a

group of people with varying skills and

experience come together to tackle a single

- 1. Plan and code an effecient model and train it with the correct hyperparameters to produce a probable and accurate result. 2. Enhance the system to work in a proper environment
- in an integrated manner to yield a cohesive solution.
- 3. Create a proper frontend dash to give critial information with atmost clarity and least delay.
- 4. Comeup with the solution that is minimal, portable less intrusive and cost effective
